Latest onset of confirmed WPV1 was 19-Apr-2014 from Guibba LGA, Yobe State.														

Latest onset of confirmed WPV was 19-Apr-2014 from Gujba LGA, Yobe State.

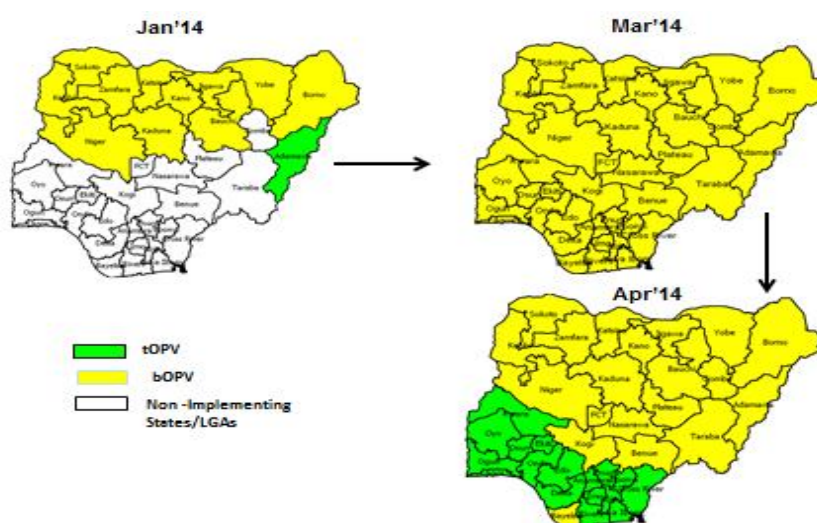

Weekly updates on epidemics in Nigeria: as at 16<sup>th</sup> May, 20141. Updates on poliomyelitis for week 19 as at May 9<sup>th</sup>, 2014

- 1.1. One Wild Polio Virus (WPV) was isolated from Gujba LGA (Yobe State) in the reporting week 19 while six (6) WPVs were isolated from 6 LGAs (4 States) at the same period in 2013.
- 1.2. Between weeks 1 & 19, 2014 three (3) WPV were isolated from 2 States compared to 22 WPVs isolated from 9 States at the same period in 2013 (Figure 1).
- 1.3. Two (2) circulating Vaccine Derived Polio Virus type 2 (cVDPV2) were isolated from 2 LGAs (Borno State) in the reporting week 19, 2014 as against one (1) cVDPV2 isolated from Kebbi State same period in 2013.
- 1.4. Between weeks 1 & 19, 2014 three (3) cVDPV2 were isolated while only one (1) cVDPV2 was isolated at the same period in 2013 (Figure 2).
- 1.5. Fifty three (53) confirmed WPV were isolated in 2013
- 1.6. As at week 19, 2014, only one (1) polio compatible case was reported from Birnin Kudu LGA (Jigawa State) (Figure 3).

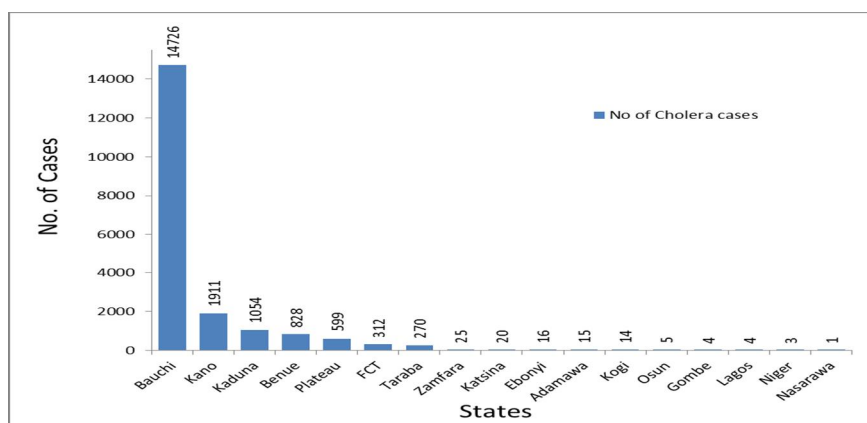

- 1.7. From January 2014 to date, 3 Supplemental Immunization Activities (SIAs) for Oral Polio Vaccine (OPV) had been conducted across the country (involving bOPV and tOPV; Figure 4).
- 1.7.1. Polio SIAs (using bivalent OPV) were conducted in selected States within Northern Nigeria between 25<sup>th</sup> and 28<sup>th</sup> January, 2014, while the National Immunization Plus Days (NIPDs) was conducted nationwide between 22<sup>nd</sup> and 25<sup>th</sup> of February, 2014.
- 1.7.2. The last nationwide SIAs (involving the use of bOPV in the north and tOPV in the south) was conducted between 12<sup>th</sup> and 15<sup>th</sup> April, 2014. The SIAs activities include the following:
  - 1.7.2.1. Establishment of health camp facilities.
  - 1.7.2.2. High level supervision/team supervisor and use of households/ household head's name.
  - 1.7.2.3. Field supportive supervision and monitoring.
  - 1.7.2.4. Improved Enhanced Independent Monitoring (EIM) and Lots Quality Assessments (LQAs).
- 1.8. FMOH in collaboration with the Rotary International held the Nigeria Polio Summit, 2014 with the theme, "Polio End Game, let's end it now".

## 2. Update on suspected Cholera for week 19 as at 16<sup>th</sup> May, 2014

- 2.1. Outbreaks of Cholera are on-going in some States across the country. So far in 2014, 14 States and the FCT have reported outbreak of Cholera between weeks 1 & 19 (Figure 5) with the most recent reported in Jos North LGA, Plateau State. This has however been investigated by WHO in collaboration with SMOH, LGA rapid response teams and other stakeholders.
- 2.2. In reporting week (Week 19, 2014), 613 cholera cases (Figure 6) with 3 lab-confirmed and 9 deaths (CFR, 1.22%) were reported from 22 LGAs (6 States) compared with no case/death at the same period in 2013.
- 2.3. Between weeks 1 and 19 (2014), 19,807 suspected cholera cases with 94 lab-confirmed and 253 deaths (CFR, 1.27%) from 95 LGAs (17 States and FCT) were reported compared with 3 cases with 1 death (CFR, 33.33%) from 2 LGAs (2 States) at the same period in 2013 (Figure 7 and 8).
- 2.4. The outbreaks were investigated by the State MOH, FMOH/MSF/WHO with other stakeholders, and are under control.
- 2.5. Actions taken by relevant stakeholders include:
  - 2.5.1. Sensitization of both health workers and communities.
  - 2.5.2. Procurement/distribution of medicines/other medical supplies.
  - 2.5.3. Supply of cholera test kits to all the States of Federation.
  - 2.5.4. Mass chlorination of wells/buckets in all households of the affected communities.
- 2.6. States are enjoined to intensify surveillance.

### 3. Lassa fever update for week 19 as at 16<sup>th</sup> May, 2014

- 3.1. Twenty-three (23) suspected Lassa fever cases with one lab-confirmed and 0 death were reported in week 19, 2014 compared with 31 cases with one (1) lab-confirmed and 0 death from Esan Central LGA (Edo State) reported at same period in 2013.
- 3.2. Between weeks 1 & 19 2014, 544 Lassa fever cases with 61 lab-confirmed and 24 deaths (CFR, 4.47%) from 25 LGAs (11 States) were reported compared with 758 cases with 141 lab-confirmed and 26 deaths (CFR, 3.43%) from 23 LGAs (11 States) at the same period in 2013 (Figure 9).
- 3.3. Outbreaks were investigated by the State MOH and FMOH and are on-going.
- 3.4. FMOH received donation of Ribavirin (100mg/ml of 4,110 ampoules) from Government of Liberia through the WHO
- 3.5. Actions taken include:
  - 3.5.1. Ribavirin distributed to some of the affected the States.

- 3.5.2. A Training of Trainers for clinicians and other health workers on Ebola, Lassa, Yellow and Dengue fever was conducted by zone between 11<sup>th</sup> & 16<sup>th</sup> April, 2014 involving all the 36 States and FCT. States are expected to cascade the training to all clinicians and other health workers in their States.
- 3.5.3. National Lassa Fever Rapid Response Committee (NLFRRC) Meeting was held on 30<sup>th</sup> April, 2014 with far reaching conclusions and the following action points:
  - 3.5.3.1. Involvement of other stakeholders to expand its composition.
  - 3.5.3.2. Development of enhanced communication strategy
  - 3.5.3.3. Regular supply of reagent to identified diagnostic centres
  - 3.5.3.4. Advocacy to relevant stakeholders for resource mobilization
  - 3.5.3.5. Reactivation of Emergency Operation Centre (EOC)
  - 3.5.3.6. Expansion of laboratory network and treatment centres
  - 3.5.3.7. Planning of National Lassa Fever Day which comes up by 27<sup>th</sup> September
  - 3.5.3.8. Memo to Mr. President on urgent release of fund to procure relevant medicines and other consumables for VHF
  - 3.5.3.9. Memo to National Council on Health on procurement of ribavirin injection/tablets and Personal Protective Equipment (PPE) by State in line with National Drug Policy.

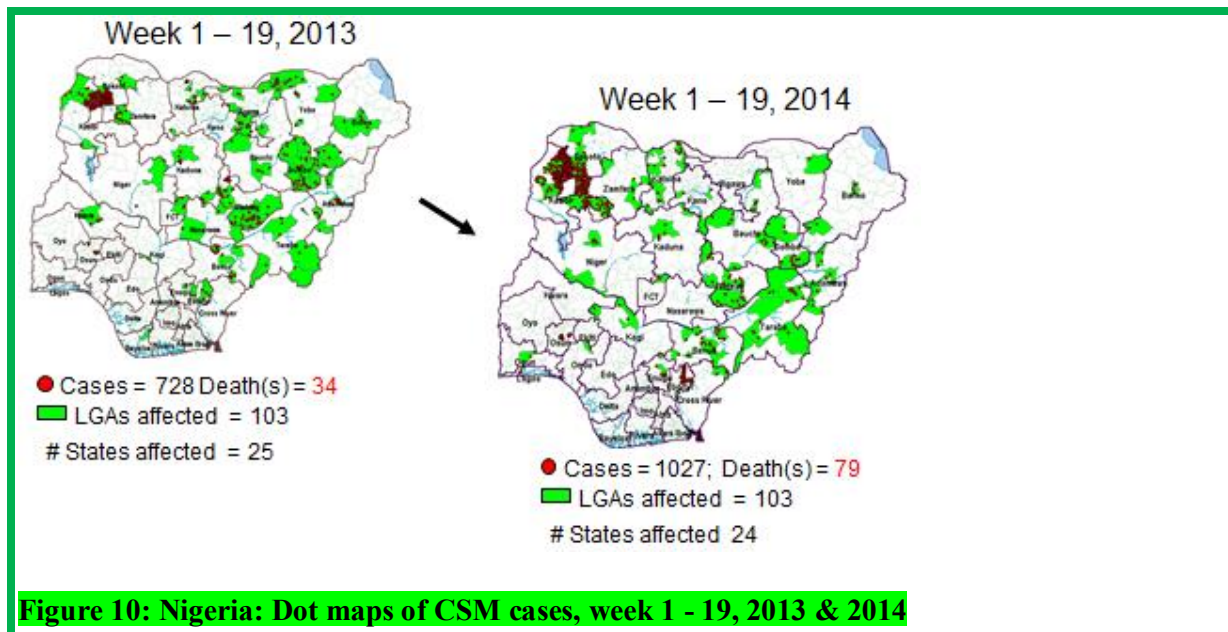

**Figure 9: Map of Nigeria showing areas affected by Lassa fever, week 1 - 19, 2013 & 2014**

#### 4. Update on cerebrospinal meningitis (CSM) for week 19 as at 16<sup>th</sup> May, 2014

- 4.1. In the reporting week (Week 19) 2014, 14 suspected cerebrospinal meningitis (CSM) cases with 0 death were recorded from 3 LGAs (2 States) compared with 5 suspected CSM cases with 0 death from 4 LGAs (4 States) at the same period in 2013.
- 4.2. The following LGAs had reached alert/epidemic threshold in Kebbi State: Aliero (weeks 4, 5, 12, 13, 16 and 17), Augie (weeks 12, 13 and 17) and Gwandu (weeks 12, 16 and 17).
- 4.3. Between weeks 1 & 19, 2014, 1027 CSM cases with 73 lab-confirmed and 79 deaths (CFR, 7.69%) were recorded from 103 LGAs (24 States) compared with 728 cases with 34 deaths (CFR, 4.67%) from 103 LGAs (25 States) at the same period in 2013 (Figure 10).

- 4.4. Timeliness/completeness of CSM case-reporting from States to National Level: on the average, average 68.2% of the 26 endemic states sent CSM reports timely while 96.4% were complete as against 70.2% timeliness and 96.6% completeness recorded within the same period in 2013.
- 4.5. The outbreak in Kebbi State was investigated by the State MOH, MSF and WHO and it is under control.
- 4.6. Actions taken include:
  - 4.6.1. A consignment of 2,500 doses of ACYW135 vaccines was supplied to Kebbi State
  - 4.6.2. On the job training for clinicians on lumbar puncture
  - 4.6.3. Distribution of rapid diagnostic kits (Pastorex) and lumbar puncture kits to all the States in the meningitis belt.
- 4.7. Intensive Surveillance is on-going in high risk States.

## 5. Update on suspected Measles for week 19 as at 16<sup>th</sup> May, 2014

- 5.1. In week 19, 2014, three hundred and fifty-eight (358) suspected cases of measles with one (1) death (CFR, 0.28%) were recorded from 26 States (Figure 11) compared with 2,446 suspected measles cases and 20 deaths (CFR, 0.82%) from 24 States and FCT at the same period in 2013.
- 5.2. Between weeks 1 & 19 (2014), 10,639 suspected measles cases with 65 deaths (CFR, 0.61%) were reported from 36 States and FCT (Figure 12) compared with 38,148 cases with 248 deaths (CFR, 0.65%) at the same period in 2013 (Figure 13).

## Federal Ministry of Health - Nigeria

- 5.3. Confirmed Measles cases (lab, epi-link and clinical) between weeks 1 and 19 (2014) were 3,127 cases (Figure 14) from 192 LGAs (Figure 15). Fifty-two (52) LGAs have so far reported confirmed Measles outbreak in 2014 (Figure 16).
- 5.4. Most affected children are within the age group 9 - 59 months (>1900 confirmed cases & 60%; Figure 17 & 18 respectively).
- 5.5. Vaccination status of measles cases is 63% zero dose (Figure 19).
- 5.6. Response measures were intensified with selective vaccination for 6 - 59 months old children and case management including vitamin A supplement.
- 5.7. Measles campaign was conducted in all the 6 geopolitical zones nationwide in 2013.

#### 6. Update on Guinea worm disease: as at 2<sup>nd</sup> May, 2014

- 6.1. As at 2<sup>nd</sup> May, 2014, no GWD rumour was reported in week 17, 2014. Three (3) GWD rumours were reported in April 2014 and investigated but only two (2) were investigated within 24 hours.
- 6.2. So far in 2014, 85 GWD rumour reports were received and investigated but 82 (96.4%) of these were investigated within 24 hours.
- 6.3. None of these rumours were confirmed to be GWD case.
- 6.4. In 2013, a total of 366 GWD rumour reports were received and investigated from 188 LGAs (31 States), of which 342 (93.4%) were investigated within 24 hours. None of these rumours were confirmed to be GWD case.
- 6.5. Nigeria has celebrated 5 consecutive years of zero reporting of Guinea worm disease in the country.
- 6.6. At the 9<sup>th</sup> Meeting of the International Commission for the Certification of Dracunculiasis Eradication (ICCDE9), **Nigeria was officially certified free of dracunculiasis transmission.**

#### 7. Update on national Influenza sentinel surveillance, Nigeria week 1 - 17, 2014

- 7.1 From week 1 - 17, a total of 478 cases were recruited of which 417 were Influenza like illness (ILI), 61 Severe Acute Respiratory Infection (SARI).
- 7.2 A total of 478 samples were received out of which 456 were processed. Of the processed samples, 401(87.9%) were ILI cases, 55(12.1%) were Severe Acute Respiratory Infection (SARI).
- 7.3 Of the 401 processed ILI samples, 33(8.2%) were positive for Influenza A and 17(4.2%) positive for Influenza B. Of the 55 processed SARI samples, 2(3.6%) were positive for Influenza A while 2(3.6%) were positive for Influenza B.
- 7.4 Fifty-five (12.1%) of the processed 456 samples were positive for Influenza, with 36(65.5%) of these positive for Influenza A and 19(34.5%) positive for Influenza B. The subtypes A

## Federal Ministry of Health - Nigeria

(2009) H1N1, seasonal H3, seasonal H1 and A/H5 account for 12 (33.3%), 8 (22.2%), 0(0.0%) and 0 (0.0%) of the total influenza A positive samples respectively. A/not sub typed and Un-subtypeable account for 16 (44.4%), 0(0.0%) of the total positive influenza A samples respectively.

7.5 The percentage influenza positive was highest (45.0%) in week 14.

7.6 In the reporting week 17, 29 samples received have not been processed.

## Distribution of the Weekly Epidemiology Report (WER)

The FMOH is currently circulating the WER to many institutions and organizations (private and public) including individual health professionals

The WER is also available on the FMOH website:

[www.fmh.gov.ng](http://www.fmh.gov.ng)

Federal Ministry of Health - Nigeria
